TABLE OF CONTENTS

BEAUTY. STRENGTH. DURABILITY.

Woodgrain Doors combines beauty, strength and durability in every door we offer. Our finely crafted doors connect your most cherished indoor and outdoor spaces. By combining the breadth of styles, designs and customizable options Woodgrain Doors offers with the superior craftsmanship of our products, you're sure to find a door to meet your functional needs while also enhancing the charm of your home.

Woodgrain Doors is one of the world's leading manufacturers and suppliers of hardwood and softwood stile and rail doors, and door components. Distributors, builders, remodelers, architects, designers and homeowners rely on Woodgrain products to build quality homes. Woodgrain is committed to innovation through continuous improvements in manufacturing, investment in design, excellence in craftsmanship and use of the highest quality raw materials to build doors that are as durable as they are beautiful.

OUR HISTORY

Woodgrain has manufactured millwork and building products for the residential and commercial construction markets since it was founded in 1954. In over 60 years in business, the company has expanded with millwork, distribution, doors and window divisions — making Woodgrain the preferred leader in the construction and home building industry.

Woodgrain Doors began in 1985 with the acquisition of Meridian Wood Products by our parent company, Woodgrain Millwork. Woodgrain Doors is headquartered in Nampa, Idaho and manufactures and distributes hundreds of thousands of doors annually.

OUR COMMITMENT

In our total commitment to the environment, Woodgrain promises to act as a responsible corporate citizen, optimizing our use of resources and producing products that have a positive impact on the environment and the health of people. The wood used by Woodgrain primarily originates from sustainable sources. Our manufacturing processes ensure over 99% of the wood fiber is used as a product. Woodgrain recycles every product possible and strives to operate in an environmentally conscious manner.

STILE AND RAIL DOOR CONSTRUCTION

Panel options for each category show an end view of the panels available.

CHOOSE A DOOR TYPE

BARN DOORS

Woodgrain Doors' Barn Door Collection is the perfect fit for modern, contemporary, and rustic applications. Built upon our superior quality craftsmanship, each barn door features either a 3/4" plank panel design to highlight the definition and elegance of the v-groove or 3/8" shaker panel. The mulls in each layout are full thickness and engineered to meet flush with the stiles and rails to provide a unique combination of beauty, strength and durability. Barn Doors allow you the flexibility to enhance an entire room with a unique accent piece, while also adding more functionality to your space. From master suites to pantries, barn doors give you the flexibility to customize your space.

BIFOLD DOORS

Woodgrain's bifold doors are crafted with state-of-the-art technology to ensure consistent precision assembly. Bifold doors are ideal for smaller spaces, including closets, laundry rooms and any area where space is at a premium. Bifold doors come with all the necessary hardware for installation.

CAFÉ DOORS

Woodgrain's café doors admit light and ventilation, and provide minimal privacy. The café doors come as a pair and swings open – in and out – in both directions for easy flow.

CRAFTSMAN DOORS

Make a memorable first impression with a Woodgrain craftsman door. The collection of exterior doors is built with unsurpassed craftsmanship and extensive design and glass options offering natural warmth and beauty to your home. All craftsman doors are built with true divided lite construction (TDL) and Low E glass, meaning that each pane of glass is a unique piece of glass providing better protection and easier finishing.

DECORATIVE GLASS DOORS

Customize your home with Woodgrain's interior decorative glass doors. Choose from geometric patterns in a variety of styles and finishes.

DESIGN COLLECTION PRIMED MDF DOORS

The Woodgrain design collection of medium density fiberboard (MDF) includes infinite options including personalized options with our auto-CAD technology. Available in fire-rated options. California 93120 CARB Compliant for Formaldehyde Phase 2.

FLAT PANEL DOORS

Woodgrain offers interior flat panel doors in a variety of wood species. Flat panel doors offer crisp lines and provide a versatile look that complements both modern and traditional interiors. Available in fire rated options.

LOUVER DOORS

Woodgrain's louver doors provide a beautifully functioning door with a touch of subtle charm between passageways. Each door is designed to provide privacy and ventilation, and ideal for closets and other spaces that require maximum air circulation. Louver doors are a sensible choice for hallways, closets and storage rooms.

PLANK PANEL DOORS

Woodgrain offers interior and exterior plank panel doors in a variety of wood species. Plank panel doors offer added dimension to complement traditional and contemporary styles.

RAISED PANEL DOORS

Woodgrain offers interior and exterior raised panel doors in a variety of wood species. Raised panel doors offer added dimension to complement traditional and contemporary styles.

SASH DOORS

Woodgrain sash doors include an assortment of handcrafted doors to complement any décor. All sash doors are built with true divided lite construction (TDL), meaning that each pane of glass is a unique piece of glass providing better protection and easier finishing. A variety of interior and exterior designs with numerous light and panel configurations available.

SIDELIGHTS

Woodgrain glass doors also include a variety of sidelights to complement any door. Adding sidelights to either or both sides of your door will increase the impact of your door by inviting natural light into the home at entry or patio doorways. Sidelights are available in insulated or single glazed glass.

TRADITIONAL & CONTEMPORARY FRENCH DOORS

Woodgrain traditional french doors offer an assortment of handcrafted doors to complement any décor. All french glass doors are built with true divided lite construction (TDL), meaning that each pane of glass is a unique piece of glass providing better protection and easier finishing. A variety of interior and exterior design options are available.

TRANSOMS

Woodgrain glass doors include a variety of transoms to complement any door. Adding a transom above your door will extend the height of your door and allow natural light into the home at entry or patio doorways. Transoms are available in insulated or single glazed glass.

UTILITY DOORS

Customize your home with a utility door in Laundry, Pantry or Wine Cellar.

PERSONALIZE WITH OPTIONS

WOOD SPECIES GUIDE

CHY — Cherry

Cherry grows in the Eastern and Midwestern United States and comes in a range of colors including white, light red, deep red and reddish brown. Cherry has a fine, uniform straight grain and a smooth texture. Cherry accepts a variety of stains and finishes.

FIR — Douglas Fir

Douglas Fir is a large, generally vertical-grained tree that grows in abundance in the Pacific Northwest. Douglas Fir is characterized by exceptional natural strength, hardness and durability. The wood varies in color from yellowish tan to light, bright brown.

KAL — Knotty Alder

Knotty Alder grows in the Pacific Northwest and is a medium density hardwood with an even grain appearance. The wood is normally light brown with hues of red or peach. Its softer nature makes it easy to machine and receptive to a variety of stains and finishes.

KPN — Knotty Pine

Knotty Pine is abundant in America. The wood has a rich display of knots that reflects the randomness and beauty of nature. The wood tends to be a honey-toned or straw color while the knots are generally reddish-brown.

MHG — Mahogany

Mahogany is characterized by its natural strength, proven durability and a rich red color. Its straight grain is usually free of voids and pockets, making it a premium hardwood known for use in high-end furniture making. Khaya Mahogany is Woodgrain standard MHG door: range and mix of colors in door parts and components from light blonde to dark brown. For more uniform, consistent color in MHG door we have premium Sapele MHG as upgrade. *Khaya MHG standard, premium Sapele available on request

MPL — Maple

Maple grows in the Eastern United States, offers a very fine grain and a whitish color tinged with reddish brown.

OAK — Northern Red Oak

Hard and heavy, Oak grows mainly in the North Central United States. With a coarse texture and a straight, prominent grain, oak accepts a broad range of stains and finishes.

PON — Ponderosa Pine

Ponderosa Pine is one of America's most abundant tree species. It has straight, uniform grain with minimal amounts of reddish-brown heartwood. The sapwood has wide growth bands, which are honey-toned or straw-colored.

POP — Poplar

Poplar grows in the Eastern United States. Colors of Poplar vary from brown to pale yellow to olive green. Over time, the green color will darken with exposure to sunlight and may turn brown. Poplar is a medium density hardwood, generally straight-grained with a fine, even texture.

PRM — Primed

Woodgrain's multiple door configurations have a primed option to allow for a better paint finish and color match process for any project. Interior applications are produced with MDF veneer and panels for superior paintability. MDF Design Collection Router Carved doors are also available.

RAD — Radiata Pine

Radiata Pine is a plantation-grown wood from Chile, New Zealand and Australia. It has a distinctive grain pattern with a pale cream color. Radiata tends to be harder than other pine species and has fewer knots.

RHK — Rustic Hickory

This unique species will have many variations allowed in the wood for character. Mineral, sap, bird pecks, heartwood and knots are common. Color may vary from a dark brown to white. Rustic Hickory is often clear coated or stained lighter shades to showcase the natural beauty of the species.

WAL — Walnut

Walnut grows throughout the eastern United States. Its color ranges from a medium light to chocolate brown. Walnut is generally straight grained with a course texture. It is a dense wood and accepts a variety of stains and finishes.

SIZES

Our doors and bifolds come in a variety of standard sizes, ranging from:

- 6'8", 7'0" and 8'0" heights
- 0'10" to 6'0" widths
- 1-1/8", 1-3/8" and 1-3/4" thicknesses

While not all sizes and panel configurations are available in all options, Woodgrain Doors can accommodate many custom orders such as replacing a panel with glass.

All species shown are clear coated.

PERSONALIZE WITH OPTIONS CONT.

GLASS

Woodgrain Doors offers 24 glass options to further customize your door. Choose from either a Clear Single Glazed or Insulated Low E glass types. Clear Single Glazed is a single piece of tempered glass whereas Low E Insulated is coated and insulated, which allows it to reflect radiant heat, making it a more energy efficient option. Not all glass options are available in all styles or species.

¹ Specie is manufactured with MDF skins and panels.

DESIGN COLLECTION PRIMED MDF DOORS

DESIGN COLLECTION PRIMED MDF DOORS

PREMIUM ROUTER CARVED MDF DOORS

Woodgrain's Design Collection MDF Doors are made of medium density fiberboard (MDF) and include both 1-3/8" and 1-3/4" doors available in panel, bifold and Fire-rated doors. Design Collection MDF doors offer infinite design options by combining cutting edge technology and quality craftsmanship. Not simply an MDF producer, Woodgrain uses its well-honed techniques from decades of wood door manufacturing to build a better door.

- Design Collection MDF doors offer:
- Exceptionally smooth surface for excellent paint adhesion
 - Unlimited design options, including most graphics and text
 - Resists shrinkage, expansion or warping
 - Environmentally friendly
 - SureEdge design

- Design Collection MDF doors with expanded polystyrene (EPS) core offer several advantages:
- 40% lighter than the standard 2'6" x 6'8" MDF door
 - Easier to handle and hang
 - Exerts less stress on the hinges
 - Improve sound transmission properties
 - Bifold doors available

 For fire rated door information see page 36

PROFILE AND PANEL OPTIONS

Mix and match any of our five profile options or two raised moulding options.

RAISED MOULDING

THE SUREEDGE ADVANTAGE

SureEdge solid wood edge band is a feature in each MDF door. Installed in each stile, the SureEdge system allows maximum screw holding power and ease of hinge mortising.

FIR 634

Create an unforgettable front door entry with a Mahogany 6514 door coupled with two 6703 sidelights and a 5-lite transom.

PREPARATION FOR FINISHING

- When staining, a wood conditioner or sander/sealer should be used to help achieve a more uniform finish. (Be sure to follow the wood conditioner manufacturer's instructions closely.)
- FIR doors should be surface treated with acetone product in advance of wood conditioner.
- Before applying the first coat of finish, thoroughly sand the entire surface of the door with 180 grit sandpaper. This crucial step helps remove handling marks, fingerprints, fiber pop, natural grain raise, possible water or liquid marks (if exposed during shipping or while on the job-site during the construction phase) and evenly prepares open wood pores to help produce a more uniform finish.
- Panels and bars float and may become out of alignment during shipping and handling. Carefully take a block of wood and mallet and tap the components in alignment. Use caution not to damage the door or component during this process.
- Clean door thoroughly with a cloth after sanding to remove all dust or foreign material. Avoid using compressed air to blow off door as moisture or oil in the air may cause spotting. Avoid using caustic or abrasive cleaners.
- Hang door before finishing it, then remove it to finish properly.

EXTERIOR FINISHING STAIN-AND-CLEAR FINISH

When staining, a wood conditioner should be used to help achieve a more uniform finish. (Be sure to follow wood conditioner manufacturer's instructions closely.) The first coat of stain may be a stain-and-sealer, a combination of stain and sealer which colors the door and seals the surface. It is available in a wide range of colors. (Dark color finishes should not be used on doors exposed to prolonged direct sunlight, as some expansion and contraction of door parts may occur. See warranty for detail.) The stain-and-sealer should have an alkyd-resin base. Under no circumstances should a lacquer-based toner or any other lacquer-based finish be used on exterior doors. The second and third coat (two top coats minimum) may be a solvent-borne (oil-base, alkyd resin-base, polyurethane resin-base) or a water-borne (latex resin-base) clear finish. On doors that are glazed, the finish used should be flowed from the wood slightly onto the glass. This will provide assurance against water leakage and protect the glazing compound from drying out.

All stain-and-clear finishes will perform better if protected from the direct effects of sunlight and weathering, and refinishing will not be required as frequently. In areas of high exposure of sunlight and weather a marine grade top coat is recommended.

INTERIOR FINISHING STAIN-AND-CLEAR FINISH

When staining, a wood conditioner should be used to help achieve a more uniform finish. (Be sure to follow wood conditioner manufacturer's instructions closely.) A solvent-borne finish system is recommended for interior doors and may be a lacquer-based system. For best performance, a minimum of two clear top coats should be used over stains. All six sides of the door must be properly sealed for warranty to apply. Woodgrain Doors have plastic film protection on the glass, removal of plastic film protection immediately after applying the finish is required. Failure to remove the plastic film at this time may cause harm to the glass and will create difficulty in removing the film at a later time. Do not use razor blades or sharp objects to remove the film or clean the glass. These items will scratch the glass.

PAINTED FINISH

Apply 2-3 coats of either oil-base or latex resin-base paints over 1-2 coats of an oil-base primer. (Latex or water base primer may contribute to raised grain and require extra sanding to achieve a smooth finish.) All finishes should be applied in accordance with the manufacturer's instructions. All six sides of the door must be properly sealed for warranty to apply.

CAUTION

- Woodgrain Doors cannot evaluate all the available paints and stains, nor customers' specific application requirements.
- Your paint dealer should know of suitable finish systems that give satisfactory results in your region. It is highly recommended that top quality finishes be selected, and the application instructions on the container be followed explicitly.
- Please do not use metal objects, (razor blades etc.) to remove caulking compound or paint and varnish residue. It is known to scratch the tempered glass. Please do not use compressed air to blow off wood doors, as condensation in the air lines may cause irregular finishing results.

WOODGRAIN DOORS WITH GLASS

Plastic film protection on the glass should be removed immediately after applying the finish. Failure to remove the plastic film at this time may cause harm to the glass and may create difficulty in removing the film. Use caution to avoid scratching the glass while cleaning it. Glass that is scratched due to cleaning is not covered by the warranty. Film should be removed by scoring edges carefully under sticking or profile edge and peeled off by hand. SOP instructions for film removal available on request.

GLASS CLEANING AND CARE GUIDELINES

DO:

- Clean glass when dirt and residue appear
- Exercise special care when cleaning coated glass surfaces
- Avoid cleaning tinted and coated glass surfaces in direct sunlight
- Start cleaning at the upper level of glass and continue to lower levels
- Soak the glass surface with clean water and soap solution to loosen dirt and debris
- Use a mild, non-abrasive commercial window cleaning solution
- Use a squeegee to remove all of the cleaning solution
- Dry all cleaning solution from window gaskets, sealants and frame
- Be aware of and follow the glass supplier's specific cleaning recommendations
- Prevent conditions that can damage the glass

DON'T:

- Don't use scrapers of any size or type for cleaning glass
- Don't allow dirt and residue to remain on glass for an extended period of time
- Don't begin cleaning glass without knowing if a coated surface is exposed
- Don't clean tinted or coated glass in direct sunlight
- Don't allow water or cleaning residue to remain on the glass or adjacent materials
- Don't begin cleaning without rinsing excessive dirt and debris
- Don't use abrasive cleaning solutions or materials
- Don't allow metal parts of cleaning equipment to contact the glass
- Don't trap abrasive particles between the cleaning materials and the glass surface
- Don't allow other trades to lean tools or materials against the glass surface
- Don't allow splashed materials to dry on the glass surface

FITTING AND HANGING

- Immediately after cutting and fitting (before hanging), seal all cut surfaces and ends of door with an effective quality sealer. See exterior and interior finishing recommendation for complete instructions.
- Prior to exterior exposure, doors should be finished with complete finish system.
- When hanging door, allow adequate clearance for swelling of door or frame in damp weather. Allow approximately 3/16" clearance for swelling when the door is installed in fully dry conditions. Jambs must be plumb.
- Do not cut doors down in height by more than 2-9/16" (13/16" maximum from top, 1-3/4" from the bottom). Care should be taken in cutting doors down in width (maximum 1/8" each side) to avoid exposing engineered core. Use sharp fine tooth saw for trimming ends of doors.
- Caution must be used to avoid impairing the strength of the door when fitting for locks. Allow at least 1" of wood back of mortise.
- Use three hinges on doors up to 7' in height and four hinges on doors over 7'. Hinges must be set in a straight line to prevent distortion.
- Jambs and stops must be set square and plumb.
- For best performance, any exterior door should be installed under an overhang equal to the height of the door.
- To minimize heat loss and save energy, use weatherstripping.

Do not use metal objects, (razor blades etc.) to remove caulking compound or paint and varnish residue, it is known to scratch the tempered glass. Please do not use compressed air to blow off wood doors, as condensation in the air lines may cause irregular finishing results.

STORING AND HANDLING

- Do not walk on any door units. Some units contain glass.
- Avoid leaving unfinished doors in direct sunlight. Prolonged exposure to direct sunlight will discolor the wood and bake on the plastic film which protects the glass during the finishing process.
- Avoid dragging doors across one another.
- Keep doors clean.
- Store doors flat on a level surface in a dry, well ventilated interior space.
- Doors should be conditioned to average prevailing relative humidity of the locality before hanging. This generally takes 48 to 72 hours.
- Doors should be delivered to the building site only after the concrete, plaster, stucco, sheet rock work and paint are completely dry.
- Doors should not be subject to abnormal heat, dryness or humidity for prolonged periods. Avoid sudden changes such as forced heat to dry out a building.
- Doors must be finished immediately upon delivery to the job site.
- If the doors are to be stored on the job site, the entire door including top and bottom edges must be sealed with a clear or pigmented based sealer to prevent moisture absorption. All six sides of the door must be properly sealed for warranty to apply.

MAINTENANCE

Your Woodgrain door has been handcrafted to last for years to come. But, like any fine piece of furniture, its finish will require periodic maintenance to keep it looking great and provide proper protection against the elements. Regular finish maintenance is also a requirement of the warranty that is included with every Woodgrain door.

Here are some signs to watch for that may indicate it is time for maintenance:

- Hairline cracks in the top coat of finish.
- Changes in the color of the finish.
- Changes in the texture of the finish, such as flaking or scaling.
- Dullness or chalkiness in the finish.

If you live in a severe climate or your entry receives a lot of direct sunlight from a southern or western exposure, you will want to examine your door's finish often. Depending on these conditions, you may also need to refinish the door more frequently.

KAL 181 PLK- For more barn door designs and options see pages 18-19.

PRM 4102 - For other flat panel primed doors see pages 14 & 15.

WARRANTY

WOODGRAIN LIMITED WARRANTY INFORMATION

Woodgrain Doors (hereafter Seller) doors are warranted to be of sound material and workmanship and to be free of manufacturing defects which would cause the door to be unfit for ordinary recommended use for the period of twenty-four (24) months on interior doors and twelve months (12) on exterior doors from the date of shipment provided the handling, installation, and finishing proper instructions are followed. Failure to follow these guidelines voids the warranty.

Normal characteristics of kiln dried wood include but are not limited to, minor swelling and shrinking of parts made from wood, raised grain, minor pitch pockets, natural grain and color variations. Natural expansion and contraction of wood occurs with variations in climatic and atmospheric conditions such as humidity and temperature and is not a defect hereunder.

Warp in the plane of the door itself will be considered a defect only if it exceeds one-quarter inch (1/4") when measured as a deviation from a straight edge. Doors over 3-0 wide or 7-0 high are excluded from the warranty against warp. Improper hanging of the door or unsquare door frames are not considered as defects. Louver doors wider than 3-0 wide are not covered for slat warp and bow.

Any doors used in an exterior application must be at least 1 3/4" thick and must be installed under an adequate overhang. An adequate overhang depends on the typical weather conditions of the site where the building is located. This means an overhang of 50% of the height of the doorway in Northern or Eastern exposures (reference illustration where Y= Height of the Doorway and X = Length of Overhang). For doors painted or stained dark colors and/or severe exposure, extreme Southern, Southwestern and Western exposures the overhang must equal the height of the doorway (Y=X) where Y = Height of the Doorway and X = Length of Overhang.

For doors stained or painted black or espresso finishes, X = Y

Any doors found to be defective by the Seller will be repaired or replaced, or the purchase price will be refunded at the option of Woodgrain Doors, provided the handling, installation and finishing instructions have been followed.

An extended warranty period is granted solely for seal failure on insulated glass units (moisture between glass) for a period of ten (10) years from the date of manufacture. At Seller's sole discretion, the replacement door or glass will be shipped FOB from the Woodgrain Doors factory. Seller will not, under any circumstances, be liable for installation, refinishing or painting. Cracked, scratched or broken glass is not covered by this warranty. The glass warranty will be void if the product is not properly installed according to Sellers installation instructions, or is used in or around swimming pools, saunas, sprinkler systems or greenhouse enclosures; or if installed over 5,000 ft. above sea level unless units were ordered with high altitude breather tubes. The warranty on doors will be void if the product is used in or around swimming pools, saunas, sprinkler systems or greenhouse enclosures. No agent, employee or representative of Seller has any authority to bind Seller to any affirmation, representation or warranty concerning Seller's products, except as expressly stated herein.

The foregoing is in lieu of all other expressed warranties. All implied warranties of merchantability or fitness for a particular purpose are hereby limited in duration up to the two-year period stated herein. The liability of Woodgrain Doors is expressly limited to replacement or repair of the defects of the door, or refunding at its option. Woodgrain Doors will not be liable for any other expense, injury, loss or damage, whether direct or consequential, arising in connection with the sale or use of, or inability to use, any product of Woodgrain Doors, for any purpose. No purchaser shall be entitled to consequential damages as defined in the Uniform Commercial Code. Final determination of whether or not a defect exists shall be made solely by Seller in accordance with procedures established by Seller.
